

MES1002 SO₂/CO₂ CEMS for scrubber applications

Marine regulatory compliance calls for reliable and compliant solutions. MES1002 is a robust SO₂/CO₂ CEMS Analyzer designed for the harsh environment of Exhaust Gas Cleaning Systems (EGCS), also referred to as scrubbers.

KEY FEATURES

MES1002 complies with international regulations for scrubbers, and the analyzer represents a significant advancement in emission monitoring technology.

MARPOL COMPLIANCE: MEPC.340(77) and MEPC.259(68).

AUTOMATIC ZERO CALIBRATION: Eliminates span and zero drift and removes the need for calibration gas and on-site calibration.

REAL-TIME MONITORING: Continuous measurement of SO₂/CO₂ ratio assuring accurate data output for regulatory compliance.

MINIMAL MAINTENANCE: Benefit from a cost-effective solution with few maintenance requirements; Simple and regular air filter replacement and probe/optics cleaning, when notified by the analyzer maintenance request.

EASY INSTALLATION: Single-unit setup with minimal configuration and easy connection (only power, air, and data).

2-YEAR CALIBRATION VALIDITY: DNV approved drift-free technology prevents zero- and span-drift. No service technicians or span gas calibrations.

RELIABLE DESIGN: Proven and verified design through mechanical and life-time testing.

LOG FUNCTIONALITY: Internal logging of gas concentrations and emission ratio. Also, warnings, alarms and system status.

Technical drawing

Technical specifications

Parameter	Description
General	
Application	In-situ CEMS for Scrubbers
Technology	SO ₂ : UV absorption spectroscopy CO ₂ : IR absorption spectroscopy
Mounting flange	Circular, bolted connection. Based on BS EN 1092, DN125, PN16 with modified bore
Mounting location	After Scrubber
Probe material	Inconel
Supported gases	
SO ₂	0 – 200 ppm
CO ₂	0 – 15 %
SO ₂ /CO ₂	The analyzer calculates the SO ₂ /CO ₂ emission ratio in accordance with MEPC.340(77)
Output resolution	SO ₂ : 0.1 ppm CO ₂ : 0.01 % SO ₂ /CO ₂ : 0.01 ppm/%
Environmental	
Operating ambient temperature (analyzer)	0 – 55 °C
Exhaust gas temperature (Probe)	Max. 400 °C (measurement will stop at 100°C)
Storage temperature	-25 – 85 °C
Ingress protection	IP55
Humidity	95% RH

Inputs and outputs	
Power	24 VDC
Ethernet	10 BASE-T/100 BASE-TX for Modbus TCP/IP communication
RS-422	Ship GPS input Supported protocol: NMEA 0183
Digital inputs	2 (relay controlled)
Compressed Air	
Supply	5,5 – 9 bar, 250 l/min @ STP
Quality**	Install and maintain a filter before the analyzer to ensure constant compliance with ISO 8573-1:2010 [1:7:2]
Power	
Power supply	24 VDC ± 25%
Power consumption	< 60 W
Dimensions	
Size (H x W x D)	922 x 375 x 284 mm (incl. probe)
Weight	35 kg
Approvals	
Marine type approval	DNV
MARPOL	DNV Statement of compliance

** In case the compressed air system holds pockets of oil/water which may flush into the analyzer, please contact our service- and support team for further assistance
